

DUAL CARE BARRIER

Ready to use lactic acid based skin conditioning barrier teat dip for continued performance between milkings. High levels of lactic acid, aloe vera and allantoin promote healthy skin regeneration, leaving teats smooth and soft and ready to be milked

Product benefits:

- Barrier base provides extended contact time reducing challenges from the environment
- Highly visible to ensure correct application and full teat coverage
- Efficacy tested to EN1656:2010

Ordering information:

- 6253 – 25 litres (2,500 cows)
- 6254 – 200 litres (20,000 cows)

Shelf life:

- 1 year from date of manufacture

Storage instructions:

Store between 0°C to 25°C.

Keep out of direct sunlight.

Post-milking use:

1. Immediately after cluster removal, apply product to teats by dipping.
2. Ensure that teats are fully covered and that product is liberally applied.

This product cannot be used through a teat sprayer.
