TECHNICAL DATA SHEET

LACTIC ACID TEAT CARE

DUAL PROTECT BARRIER

Ready to use lactic acid and iodine based skin conditioning barrier teat dip for long acting performance between milkings. The unique combination of iodine and lactic acid in a barrier base provides long acting teat disinfection.

PRODUCT BENEFITS:

- High levels of lactic acid to promote healthy skin regeneration leaving teats feeling soft and supple.
- Highly visible to ensure correct application and full teat coverage.
- Efficacy tested to EN1656:2010.

INSTRUCTIONS FOR USE:

Postmilking Use:

1. Immediately after cluster removal, apply product to teats by dipping.
2. Ensure that teats are fully covered and that product is liberally applied, refill dip cup as necessary.
3. Dip cups should be emptied after use and washed before re-use. do not pour unused product back into the container.

This product cannot be used through a teat sprayer.

Shelf life:

1 year from date of manufacture.

Storage:

Store between 0°C to 25°C.

Keep out of direct sunlight.

For health and safety information, please refer to the Safety Data Sheet.

SIZES AVAILABLE:

- 25 litre - Code P941
- 200 litre - Code P942
